

## 24/7 Monitoring & Global Tracking

Henderson Risk Limited delivers an effective global tracking capability, which can be monitored either from HRL's response centre or locally in-country.

HRL's global monitoring solutions use the Inmarsat satellite system which provides two-way communication, tracking and alerting for individual and fleets of units across the globe. These results are delivered to a software platform, which allows us to display and monitor our clients' assets. Each local project can be configured to have its own version of this facility in their Operations Room.

The tracking system performs three main roles:

- **Global Satellite Tracking** - HRL's global tracking and response centre can monitor the movements of employees, vehicles or assets, particularly those working in remote areas or where an increased risk has been identified. In the event of an emergency of any kind, whether an RTA or a more serious threat, a panic alarm can be activated to immediately alert a response team to the problem.
- **Operations and Crisis Coordination** - the central crisis management and coordination centre also tracks and monitors each unit. The centre is on hand 24/7 to provide assistance and coordination in the event of an emergency.
- **Fleet Management** - the software can deliver a comprehensive set of Fleet Management solutions which can be used to monitor drivers and train them in safe and efficient driving techniques.

HRL's global monitoring and tracking utilises the Honeywell Global Tracking system ([www.gt.honeywell.com](http://www.gt.honeywell.com)). Honeywell is a leading provider of world class technologies and have a proven operational track record and global reach.

### PRODUCTS

- 24/7 global monitoring with messaging, alerting and response capability
- Fleet management reports for driver safety training, efficient driving and driver awareness
- Robust, lightweight personal tracking units with a dedicated, protected alert button
- Vehicle-borne satellite tracking systems for mobile, high-value or semi-permanent assets

---

### BENEFITS

- Dedicated 24/7 monitoring and response
- Discreet and easily operable personal tracking units
- Alert notifications via SMS and email
- Panic alert function
- Global coverage and immediate response

---

### CONTACT

If you have any questions or would like to receive more information on any of the services outlined above then please e-mail [protection@hendersonrisk.com](mailto:protection@hendersonrisk.com) with your query or call us on +44 (0) 207 730 5446.
