

Site Security

Henderson Risk Limited plans and implements focused physical security measures and procedures to protect people, property and business against terrorism, kidnap, violent crime, theft and other threats within the environment in which they are operating.

HRL provides physical, technical and integrated site security services to deliver the most efficient solution to our client's needs. This can be delivered through a security survey or by establishing a baseline security management programme incorporating people, procedures and hardware that can be built on according to the level of assessed risk.

HRL can provide a wide range of layered security solutions including CCTV and intruder alert systems which are combined with robust and appropriate fencing and an alert and responsive guard force to ensure effective access control, loss prevention and a quick response to any incident. HRL provides trained and regularly assessed guards, who are supervised and managed by qualified security managers. Careful strategic positioning, regular patrolling and a diligent 'people approach' to supervision and management will ensure that HRL's site security offering is effective and proactive.
